

S46LM Renstraße

**A Swiss Made mechanical watch created for the
BMW M enthusiast.**

Built from the spirit of the E46 M3

The S46LM Renstraße was created for collectors who see the BMW M3 E46 as more than a car.

It represents balance, response, engineering, and emotion — the qualities that defined one of the most iconic analogue M cars ever made.

The S46LM brings that same spirit to the wrist through Swiss Made mechanical watchmaking, purposeful design, and limited production.

This is not BMW merchandise. This is an independent collector watch created for people who understand machines.

A dial with mechanical purpose

The S46LM dial is built around contrast, symmetry, and movement.

The red and blue dial zones create a strong motorsport identity, while the central vertical mechanical motif gives the watch its technical

Every element is placed with purpose:

Black chapter ring with minute markings

Red and blue main dial zones

Central mechanical-inspired vertical motif

Silver hour and minute hands

Red seconds hand

Date window at 3 o'clock

S46LM logo on the dial

Motorsport presence. Daily wearability.

The S46LM uses a 42mm black PVD-coated steel case with a purposeful, modern profile.

It has the presence expected from a motorsport-inspired watch, while keeping proportions suitable for daily use.

The watch is available with two strap options:

Black racing FKM strap

Blue elastic strap

One gives the watch a sharper track-focused attitude. The other brings a more relaxed, lightweight motorsport feel

Swiss Made automatic movement

Inside the S46LM is the Swiss SW200 automatic movement, chosen for its reliability, practicality, and mechanical character.

It delivers approximately 38 hours of power reserve and gives the watch the honest mechanical foundation expected from a serious Swiss Made piece.

No digital gimmicks. No unnecessary theatrics. Just a mechanical watch built for collectors who value connection, engineering, and purpose.

Produced in limited numbers

The S46LM is not created for mass production.

STIL Timepieces builds watches in small quantities, with a boutique approach and direct communication with collectors.

The S46LM is limited to 35 pieces per year, making each allocation personal and intentional.

For BMW Live UK, we are presenting the S46LM directly to the community that inspired it: BMW M owners, collectors, and people who understand why analogue machines still matter.

35 pieces per year. Ready for production. Express Interest to begin the conversation

Express Interest

Ready for production.

The S46LM is now ready for production.

To request your allocation conversation, register your interest through the website.
