Edition**

# Megara Titanium Watch

Megara Titanium – A Fusion of Precision and Vision  
Limited to 100 Pieces Worldwide

The Megara Titanium is not just a timepiece — it is a statement of engineering excellence and artistic ambition. Forged from lightweight Grade 2 titanium, its 42mm case is sculpted for performance and presence. A scratch-resistant ceramic bezel and sapphire crystal ensure enduring clarity and resilience, while its 300-meter water resistance affirms its readiness for any challenge.

The dial is a masterpiece of contrast and motion, blending turquoise and graphite tones inspired by the aerodynamic curves and livery of the Megara Hypercar Prototype. Every detail evokes speed, control, and elegance — a tribute to the founder's passion for motorsport and design.

## A World First in Horology

For the first time, a luxury mechanical watch is paired with a digital hypercar collectible — a high-definition 3D model rendered exclusively for Megara owners. This is not a collaboration; it is a unified creation. One design language. Two realms. Infinite impact.

# Megara Digital Hypercar NFT

Where Speed Meets the Blockchain

The Megara Digital Hypercar is a high-definition 3D collectible that embodies the spirit of futuristic automotive design. Conceived alongside the Megara Titanium Watch, it reflects a shared design language rooted in performance, innovation, and exclusivity.

## Key Features

### High-Detail 3D Model

A meticulously crafted digital sculpture, showcasing advanced aerodynamics and bold styling.

### Exclusive Ownership

Each NFT is uniquely paired with a Megara Titanium Watch — a 1:1 relationship between physical and digital craftsmanship.

### Unlockable Content

Includes high-definition rendering and a digital certificate of authenticity.

### Metaverse-Ready

Delivered in STL format, optimized and ready for 3d printing.

# Digital + Physical Pairing

Each Megara Titanium Watch is uniquely paired with a Megara Digital Hypercar NFT.

This 1:1 pairing ensures every owner holds a one-of-a-kind digital and physical masterpiece.

# Design Philosophy

## Megara: A Fusion of Precision and Digital Artistry

Megara is more than a timepiece or a hypercar — it is a unified design philosophy. A seamless blend of mechanical precision and digital innovation, born from a singular vision to redefine luxury in both the physical and virtual realms.

## The Digital Hypercar

Crafted as a high-definition 3D collectible, the Megara Hypercar is engineered with two distinct aerodynamic configurations — each designed for different driving dynamics and visual impact:

**Track Aero Package:** Aggressive downforce, extended splitters, and kinetic aero flaps for maximum performance.

**Touring Aero Package:** Sleeker profile, refined airflow, and adaptive elements for long-distance digital cruising.

These configurations are not just visual — they represent a new form of digital personalization, echoing the modularity of high-performance machines.

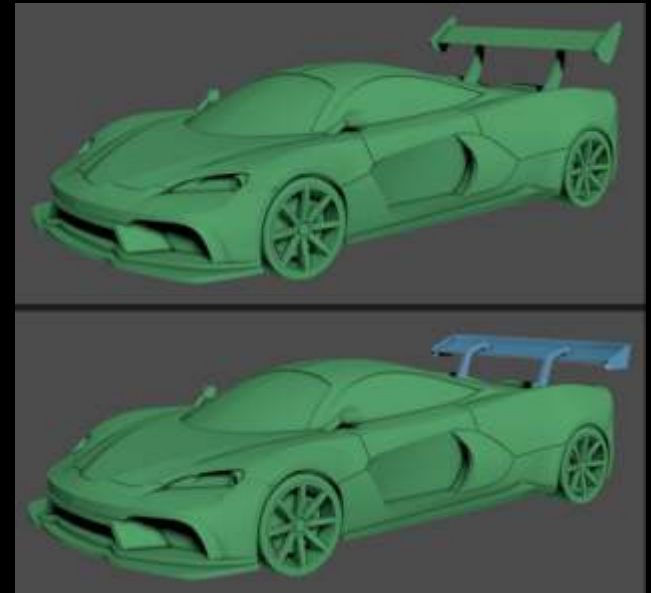

## The Titanium Timepiece

The Megara Titanium Watch mirrors this duality with two interchangeable straps:

**Titanium Bracelet:** Bold, sculpted, and engineered for presence.

**Silicon Band:** Lightweight, flexible, and built for motion.

Just as the hypercar adapts to its environment, the watch adapts to your lifestyle — from boardroom to racetrack.

# Limited Edition

- Only 100 units of the Megara Titanium Watch and NFT will be produced. Each unit is individually numbered and authenticated.
- **Crafted for collectors, each piece is a rare fusion of timeless design and digital legacy.** Once sold out, this edition will never be reproduced—own a moment in history.

# Packaging & Experience

Premium packaging with custom inserts  
Includes: Watch, NFT transfer instructions, digital certificate

Designed to deliver a luxurious unboxing experience

# Stil Timepieces

---

. **Stil Timepieces** is a brand born from a deep passion for horology and high-performance design. Our mission is to fuse the precision of traditional Swiss craftsmanship with the limitless potential of futuristic innovation.

The **Megara Titanium Watch** is the embodiment of this vision—where high-end Swiss horology meets cutting-edge 3D modeling. Each of the 100 individually numbered units is paired with a unique NFT, securing its authenticity and digital legacy.

This timepiece is engineered for every occasion—elegant enough for formal wear, robust enough for the track. The accompanying full-scale 3D-printable car model is no gimmick: its body, brakes, and aerodynamic elements were each designed with purpose and precision, mirroring the watch's own meticulous construction.

**This is more than a watch. It's a statement. A collectible. A fusion of time, technology, and performance.**

# Specifications & Availability

---

Case Material: Grade 2 Titanium

Bezel: Ceramic

Crystal: Sapphire

Movement: Swiss Automatic (Sellita SW200)

Water Resistance: 300 meters

Strap: Dual system – Titanium & Silicon

NFT Pairing: Includes hypercar NFT with unlockable content

Packaging: Premium unboxing experience

## A Message from the Founder

Dear Collector

Thank you for choosing to be part of the STIL journey.

This watch is more than a timepiece—it's a reflection of everything I believe in: precision, purpose, and passion.

As the founder of STIL Timepieces, I've always envisioned a brand that bridges the worlds of engineering and horology, where every detail tells a story and every component serves a purpose.

The Titanium Limited Edition was born from that vision.

Crafted from lightweight titanium and paired with a digital hypercar 3d model, it represents the fusion of mechanical tradition and digital innovation. It's a tribute to those who appreciate craftsmanship, but also dare to look forward.

I've spent countless hours under the hood of my race cars, chasing performance and perfection.

That same mindset drives STIL—where every watch is built with the same intensity and respect for detail that goes into building a machine meant to move fast and last long.

Only 100 pieces exist. You now own one of them.

Whether you're a collector, a creator, or a connoisseur,

I hope this watch becomes a symbol of your own journey—one marked by bold decisions and timeless values.

Welcome to STIL.

Warm regards,

Ilias Strousidis

Founder, STIL Timepieces
